

ProjectTracker

Managing Transportation Projects

ProjectTracker gives MPOs and RTPAs tools to gain control of and easy access to up-to-date transportation project data. ProjectTracker streamlines communication by effectively electronically linking regional staff, local agencies, and state databases. ProjectTracker provides an array of real-time interactive management reports, saving significant staff time and resources previously spent collecting and assembling data. The ProjectTracker solution supports diverse business needs from managing transportation projects, producing RTP/RTIP reports, financial constraint analysis, GIS maps, to tracking payments of regional transportation tax dollars.

IMPLEMENTATION

EcoInteractive provides ProjectTracker software as a service to MPOs and RTPAs via the Internet. Because no two agencies are completely alike, EcoInteractive customizes ProjectTracker for individual agencies. We work to provide the best value and quickest time frame to meet your specific implementation needs.

Annual ProjectTracker service packages include Help Desk support and technical support. This means that as your needs change, EcoInteractive will quickly respond.

FEATURES

Project Management

Enables project managers to track information and funding for individual project versions for a specific adoption of an amendment. Includes spell check and other QA features.

Electronic Submission

Easy to use tools for local agencies to electronically submit new projects, carry-over projects, or amend projects.

Review & Notification of Electronic Submission

Robust tools enable MPO or RTPA staff to review electronic project submissions. Highlights new changes to the project to streamline the review process. Includes automated email notifications.

Financial Constraints Manager

Provides easy, complete and efficient, real-time financial analysis to manage and track total revenues, programmed, and remaining balance for funds.

Local Project Manager

Enables robust tracking of local transportation projects outside of the state FTIP. Allows MPOs and RTPAs to track, store, and report all of their transportation data in a single data management system.

Automated Data Exchange

Streamlines reporting and uploading to state data management systems (CTIPs) and downloading/import of STIP and SHOPP data. Fully compliant with the new Caltrans FASS system.

Adoption Manager

Efficiently provides status and summary information for each project from the previous document cycle.

Non-Federal Funds Match Alert

Provides an easy to use interface to track non-federal fund match requirements.

ProjectTracker GIS Net

Extensively developed technology seamlessly connects all ProjectTracker modules with a GIS interface.

Document Archiver

Enables organizations to upload and immediately share electronic documents.

User Profile Manager

Allows MPO/RTPA staff to easily "point and click" to manage any user's access to various screens and reports.
